

original frames

direct answer:
35 cm ✗ (GT 40)

start at spot 3:
still wrong (35)

Forward

after Forward the answer
flips to 40 cm ✓

oracle labels:
Forward,
then Stop

the shortest trajectory whose answer becomes correct supervises the controller; every visited state -- including the wrong ones (35 cm) -- is labelled by answer correctness and trains the confidence head; questions that are already correct from the frames contribute depth-zero Stop labels, teaching the controller not to over-explore.
